## COSMOS AGENCIES GO LIVE WITH TRANS-i SOLUTION

PERU – Cosmos Agencies goes live with their customized back office ERP system designed and developed by Trans-i Technologies – world leader in software solutions for the maritime and transportation industries.

Cosmos Agencia Maritima S.A.C. is the largest maritime agency in the country. With 10 offices in the main Peruvian ports, it provides documentary, stevedoring and maritime agency services to several major shipping lines including Hapag Lloyd, Hamburg Süd and Columbus Line - among others.

The package Trans-i developed for Cosmos encompasses the entire port management process of a multi liner shipping agency. Included among the services supported by the system are:

- Vessel/crew services prior to the vessel arrival
- Load/discharge operations
- Cargo dispatch/pick up, container repositioning, etc.
- Vessel/voyage schedules
- Demurrage/Per Diem control
- Complete reporting/invoicing to the different shipping lines

Cosmos Agency process and operations functions are completely handled through this state of the art ERP system. In fact, Trans-i was pleased and proud to discover that this solution is so comprehensive and effective that one of the general agents of a liner supported by Cosmos - operating in the very same building as Cosmos – has chosen to utilize Trans-i's application rather than the one originally designed for that line's general agent!

### **About Trans-i**
