TRANS-i TECHNOLOGIES RELEASES ITS NEW MAINTENANCE & REPAIR (M&R) APPLICATION

Fort Lauderdale, FLORIDA – Trans-i Technologies, Inc. is pleased to announce the release of the latest addition to its suite of state of the art maritime software solutions. Trans-i's Maintenance & Repair (M&R) integrated system was developed to provide the transportation industry with an advanced powerful tool to identify, track, manage and control equipment maintenance and repair. It is designed to minimize equipment down time and reduce maintenance costs while increasing ROI and overall profitability.

This state-of-the-art system gives users full control over the equipment fleet management process. Trans-i's M&R provides an integrated information flow from repair estimate, survey, work order and repair status – to invoicing and statistics. The complete workflow is seamlessly integrated with an easy to use, intuitive interface. Trans-i's M&R provides web-based capabilities for a carrier's repair vendors and surveyors giving them the ability to enter information on each damaged unit, repair estimates and progress. Utilizing a centralized data source, users have access to the same information - eliminating redundancy, reducing error rates and improving efficiency.

Key Product Features:

- Repair Vendor Estimate
- Survey Request
- Repair Authorization and Approval
- Customer and 3rd Party Invoicing
- Part Costing and Definition
- Relative Cost by Vendor, Terminal and currency
- Customized Management Reporting Capabilities
- Web Interface
- Handheld Device Capabilities
