TRANS-i TECHNOLOGIES ADDS POWERFUL NEW FEATURES TO THEIR BUSINESS INTELLIGENCE SOFTWARE

Fort Lauderdale, FLORIDA – Trans-i Technologies, Inc. announces the addition of major features to its business intelligence software - Trans Intelligence. This integrated Business Intelligence System provides the transportation industry with a highly interactive environment that supports the latest generation of management reporting and analysis. Based on powerful state-of-the-art data architecture, Trans Intelligence integrates information from key sources and summarizes, analyzes and reports it using client-defined best practices. Trans-i's business intelligence solution will significantly improve user net yields, ROI and profitability while reducing costs through more responsive and effective management.

Product Features:

- **Adaptable** – can be adapted to any existing architecture and platform in the market
- **Portable** - includes interfaces for mobile devices such as Pocket PC, Palm, and export enabled to different formats such as Excel (XLS) and XML
- **Scalable** – it can be scaled to the required user level
- **Accessible** - from anywhere in the world via the Internet
- **Flexible** – designed to allow straightforward query and analysis. Ad-hoc tools allow for customized reporting which can be shared across the company on the Internet.
- **Friendly** - equipped with easily understood graphs and diagrams and tools for personalizing mobile web sites (PC, WAP, PDA, etc.)
- **Business Oriented** - includes predefined industry-standard reports, which can be customized according to business or user requirements

Trans Intelligence allows users to leverage existing data investment - quickly turning data into meaningful reports and analysis with organization-wide access. With comprehensive reports and analysis capability, results can be viewed cross functionally. Robust data mining allows users to rapidly uncover causes and understand what works and doesn't in business performance. With key departments and decision makers accessing the same information, less time is spent debating the information - allowing more time to create solution and opportunity. With the reporting and analysis based on key business drivers, users see changes in real time and are empowered to make the right decisions at the right time.
