## TRANS-i TECHNOLOGIES HONORED WITH THE PC WORLD AWARD

Lima, PERU – Trans-i Technologies, Inc. was recently honored with the prestigious PC World Award. It is presented annually by the PC World Peru Magazine to distinguish the best solutions and technological products in the country. The prize was awarded to Trans-i for “Best Application - National Development”. The product being recognized for its functionality is ‘Your ISS’ (main portal) developed for Inchcape Shipping Services, the largest marine services group in the world. It is an ERP web based system that administers all ISS port services in the world, including finance, services and operations.

‘Your ISS’ was developed to link the user's desktop to ISS' network of offices and their menu of integrated solutions. With it, the user can transform the speed, scope and, consequently, the value of the information ISS provides. By doing so, ISS moves beyond the traditional and reactive role of the agent responsible for 'reporting' events after they occur, to a new and more proactive role of 'managing' key operational, financial and port information. At the same time, through the full integration of their global network of over 200 offices, Inchcape's horizon has been broadened from 'the port' to 'the voyage' to make "Your ISS" the industry's first Voyage Management service. Main features of the system are the following:

### **Set up Hot Views and Standard reports**

- Easy to use parameter based reporting for those last minute or unusual requests in minutes.
- Receive customized automatic alerts.
- View reports via the web or download directly into the customers' systems.
- Your ISS is supported by high level security and password access.

### **Tailored Menus**

- Tailor the customer profile menu to user specifications.
- Add new categories of products when required.
- Adjust the menu as business priorities change.
- Access Port and Market data geared specifically for the customers' needs.

### **Proactive Alerts**

- Establish proactive alerts based on user defined requirements.
- Select the method of communication (e-mail, fax, SMS, phone).
- Parallel messaging to all players in the business process as defined by the customer.

### **Business Visibility**

- The ISS dashboard allows users to see exactly where goods/services and money are in the supply chain.
- Real-time linking of local office's operational and financial systems.

## Flexible Reporting

Access ISS' financial data warehouse to meet the customer's requirements.  
Preview reports or queries on the customer's browser or download directly into his/her PC or company systems.  
Set up routine schedule and standard reports based on point and click report building

## Security

ISS uses the latest Internet and database security.  
Access restricted to client data.  
Users can set authority levels within their organization.

## About Trans-i
