P & O PORTS GOES LIVE AT NAPOLEON TERMINAL

PORT OF NEW ORLEANS, LA – P&O Ports North America, Inc. announced the successful implementation of its comprehensive port automatization project at Napoleon Terminal located at the Port of New Orleans. Napoleon is considered the most technologically advanced terminal in the U.S. This fully integrated, customized application, developed by Trans-i Technologies, Inc., is a Web based, multi-use and multi-terminal operator system designed to fully maximize efficiency and security, while eliminating gate congestion.

Trans-i also developed the state-of-the-art terminal control system which was implemented in 2003. The GEM (Gate Entry Management) system, interfaces with P&O Port's terminal operating system, radio frequency identification, AM radio, text & cell phone messaging, optical character readers, weigh in motion scales, driver communication pedestals and radio data terminals using the most recent programming techniques based on J2EE. GEM, the most sophisticated Gate Management System in North America, allows P&O to effectively allocate labor and equipment in addition to creating operational efficiencies and dramatically increased terminal throughput.

The P&O Ports system, combined with GEM, will ensure that cargo container traffic will roll safely and efficiently through the Port of New Orleans for many years to come.

As a result of the development of P&O Port applications and it's contributions to the advancement of maritime technology solutions, Trans-i Technologies was awarded the 2004 IT Users Award. This award is presented annually by the IT Users Group Association of Peru. This group honors those technology companies who have made significant impacts in providing IT solutions that exceed the standards of excellence set forth by this prestigious group.

About Trans-i

Trans-i Technologies is a recognized leader in providing world-class software solutions for the maritime shipping and transportation industry. With nearly two decades of experience, Trans-i provides powerful, integrated solutions to the marketplace through leadership in advanced technology and applications development. Trans-i also provides consulting services, IT outsourcing solutions, technical services and support. Some of Trans-i's clients include Inchcape Shipping Services, Dole Foods, Totem Ocean Trailer Express, Compania Sud Americana De Vapores (CSAV) and Del Monte Fresh Produce.

Founded in 1996, the company is headquartered in Fort Lauderdale, Florida with Development Offices located in Lima, Peru. For more information – please visit www.trans-i.com
