TRANS-i TECHNOLOGIES RELEASES ITS NEW TRANSHIP.NET APPLICATION

Fort Lauderdale, FLORIDA - Trans-i Technologies is pleased to announce the release of its new TransSHIP.NET application. TransSHIP.NET is a 100% browser based liner solution developed using the latest cutting-edge technology, Microsoft.NET. It is the first pure .NET ERP transportation software solution. Based on the company's flagship product, TranSHIP™, it provides the ability to quickly and reliably build, host, deploy and utilize connected solutions utilizing the Web. TransSHIP.NET is robust and provides multiple layers of security. Access is restricted to authorized users, data is encrypted using SSL (secure socket layer) and the application is equipped with an automatic log-out function.

With zero footprint and a working from a centralized database, TransSHIP.NET enables quick worldwide rollout of new stations and offices at a fraction of the cost and time.

This complete web application provides the same features and benefits offered by our TranSHIP™ client-server suite and covers the entire business cycle including:

- Customer Relationship Management (CRM)
- Quotes
- Booking
- Documentation
- Equipment Control
- Contract Management
- Intermodal

Additional Benefits:

- Instant connectivity, flexibility and increased responsiveness.
- 24x7x365 access from anywhere in the world.
- Significant reductions in IT expense –all that's required is an Internet connection, a browser with data accessed from one central location.
- Added flexibility in meeting market and business demands –the portability and instant access enables rapid respond time to industry opportunities.
- Impressive impacts to ROI and profitability.

About Trans-i
