## **CSAV's Booking & Documentation System Migrates to .NET** *Strategic change for a more scalable system*

Fort Lauderdale, FL - CSAV's BDS application (Booking & Documentation System) went into production finalizing their COM-to-.NET conversion. After meeting all of the required milestones Trans-i announced the delivery of a more robust and scalable system that currently consumes fewer databases and server resources.

This smart migration will not only bring the largest carrier in South America a tangible business value through the increased efficiency and cost savings but will avoid errors due to the different platforms previously used by the BDS system, thus resulting in an efficient and reusable business layer with a much larger flexibility and interoperability.

During the second semester of this year additional releases are expected in order to comply with the specific needs of CSAV Agencies worldwide, these are scheduled to be delivered by the end of November of this year, a final production is scheduled for late January of 2009.

**About CSAV :**

Compañía Sud Americana de Vapores (CSAV) is one of the oldest shipping companies in the world, founded in Chile in 1872, is a well recognized global carrier that operates in the five continents. With services that link the Atlantic & Pacific coasts of South America with the rest of the world, CSAV currently operates an average fleet of 100+ ships in the transportation of general cargo in containers, bulk, reefers and vehicles.

CSAV's philosophy is to attain a superior level of quality service for their customers to provide them with timely and efficient measures that will improve their foreign trade operations. This is being achieved through technology and services available at each one of their locations worldwide.
